

# AleoBlue: The Bluetooth NLC Solution for Your Networked Lighting Control Buildings and Projects!

**AleoBlue is the solution for your building or project if:**

- **You have an existing Enlighted Lighting Control System and unable to obtain** replacement parts, software upgrades to maintainance your current system.
- **You have an existing Enlighting Control System and your business is looking to expand the system** and you are unable to utilize Enlighted hardware or software.
- **You are looking to create a new project** and are aware of Enlighted and Networked Lighting Control and are in need of a proper replacement for new project design.

**GOOD**

**SCENARIO #1:** You have an existing Enlighted system and have recently done an upgrade within the last 1 month to 1 year.

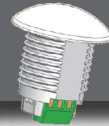

*Suggested Solutions:*

**Sensor/Node Replacement**

Keep existing lighting fixture and replace the luminaire level lighting controller with an AleoBlue sensor node (linear pendants, troffers, radial wraps, high bays, etc.)

**Retrofit Downlight with LLLC AleoBlue Node**

Keep the existing fixture (less downlights) and replace the sensor/node

**BETTER**

**SCENARIO #2:** You have an existing Enlighted System over 1 year and are looking to upgrade to modernization through energy efficiency and aesthetics.

*Suggested Solutions:*

**RKLS SR/RC Series**

Linears as a replacement for outdated LED bars and/or fluorescents

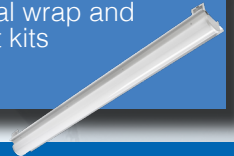

**LTR G6 or LPR-BL Series**

Troffer and Flat Panel Retrofit Kits

**LSR UX Series**

Linear radial wrap and strip retrofit kits

**BEST**

**SCENARIO #3:** You have any existing Enlighted System and are looking to upgrade and expand your Networked Lighting Control and/or Building Management system to other devices, buildings or locations.

*Suggested Solutions:*

**LWS UX Series**

**LPA UX Series**

**LT-CD G6 Series**

**SCB UX Series**

**ALX Series**

*and MORE*
