Wireless aleoBlue, AC powered, Wall-Box Dimmer Single-Rocker Switch

Sensor Operation

DESCRIPTION

WM-AC-DMSR/BT

WM-AC-DMSR/BT Bluetooth mesh dimmers provide automatic lighting control for a variety of indoor applications. They can replace any standard single-pole wall switch. Typical applications include public restrooms, private offices, classrooms, conference rooms, storage spaces, and break rooms.

APPLICATIONS

Indoor: retail, education, hospitality, corporate, warehouse, self storage.

The Dimmer connects to a Bluetooth mesh network to

can program dim levels and set scheduling through the

aleoBlue iOS app. The unit also functions as a manual

control all of the lights in a specific zone. End Users

dimmer without control wires to the luminaires.

WM-AC-DMSR/BT

Wall Mount

Specification Features

Overview

- Bluetooth[®] SIG mesh
- Manual on/off (Wireless)
- Continuous Dimming (Wireless)
- · LED status indicator light
- · Mounts in any standard wall box
- · Color: white

Certification

UL Listed. All components have UL certification.

Warranty

5-year Limited Warranty. See warranty documentation for more information.

Performance Summary

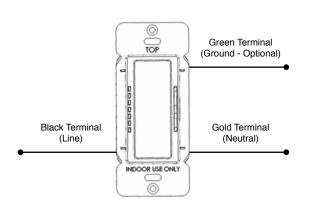

Sensor Type	Dimmer Wall Switch	
Input Voltage	120-277 VAC, 50/60Hz	
Power Consumption	Max 1.5W	
Max Bluetooth Range*	30ft (9.14m)	
Operating Temperature	0° to 55°C	
Storage Temperature	-10° to 60°C	
Relative Humidity	90-95% non-condensing at 30°C	
Mounting	Standard wall box	
Color	White	
Warranty	5 years	

Dimensions

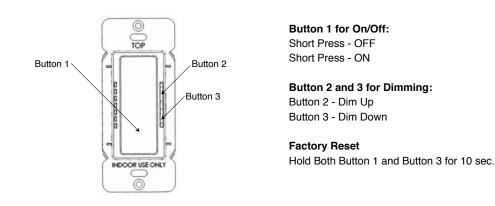

*Bluetooth Range is highly dependent on the integration of fixtures, sur-rounding environment and conditions. It is recommended to conduct testing for range accuracy.

AleoBlue Wireless Bluetooth Controls

The AleoBlue is a complete solution for managing connected lighting systems using a Bluetooth Mesh lighting network. This enables seamless implementation of simple to complex lighting control scenarios without specialized training or lighting control engineering expertise.

DLC NLC Qualified.

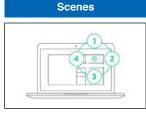

Features and Benefits

- Lighting Zones / Grouping
- Manual control of individual lights
- On Power up Behavior
- Zone Linking
- Vacancy Sensing
- Per fixture Daylight Control •
- Per zone Daylight Control

- Optimized Energy Consumption
- Less Hassle with On-Site Adjustments
- More Savings
- Increased Safety
- More Flexibility

Occupancy Sensing

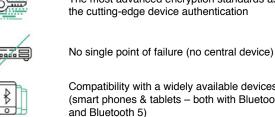

- Intuitive and user-friendly web and iOS apps
- No specialized training or lighting control expertize required
- Optimized for commercial spaces of any size
- No additional wiring or central control box
- Customizable lighting control parameters
- Future proof with Software Updates
- Multiple Zone Configurable
- Built-In Scenarios + Customization

Bluetooth Mesh Technology Advantages

The fastest low-power communication

Scalability to thousands of devices

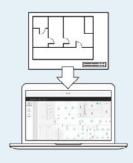

Compatibility with a widely available devices (smart phones & tablets - both with Bluetooth 4.0

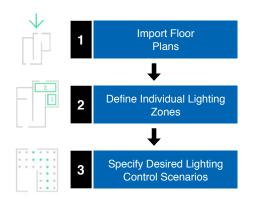

aleo**blue**

Planning

Remote preparation of a retrofit project with the use of our web app. Uploading floor plans, defining individual lighting zones and choosing lighting control scenarios.

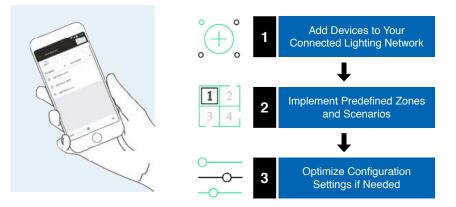

Implementation

Adding lighting devices to the Bluetooth mesh network on-site with the use of an iOS app.

Customization and calibration of lighting control parameters during and after the commissioning process. Defining scenes for specific working activities.

Provisioning / Configurations

The Bluetooth mesh Node is in the Unprovisioned Mode until it is provisioned by a "Provisioner", which typically is a smart phone with a Bluetooth mesh compatible app.

Ambient Light Sensor

Lighting Control Scenarios

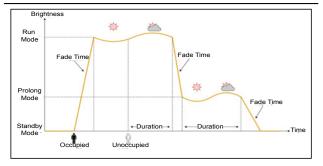

Multiple lighting control scenarios are available once the Bluetooth mesh Node is provisioned. At each scenario, duration, fade time and target brightness can be configured at any time with the iOS app.

Occupancy Scenario

Occupancy Scenario - with Daylight Harvesting

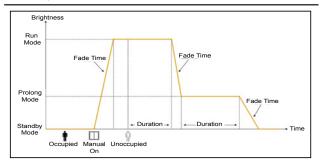

Unprovisioned Mode	-	-	-
